About Verrica Pharmaceuticals Inc.

Verrica is a medical dermatology company committed to the development and commercialization of novel treatments that provide meaningful benefit for people living with skin diseases. The company's late-stage product candidate, VP-102, is a potential first-in-class topical therapy for the treatment of molluscum contagiosum, a highly contagious viral skin infection affecting approximately six million people, primarily children, in the United States. There are currently no FDA-approved treatments for molluscum. Following positive topline results from two pivotal Phase 3 trials, a New Drug Application for VP-102 for the treatment of molluscum is planned for the second half of 2019. VP-102 is also currently in a Phase 2 trial for the treatment of common warts, with an additional Phase 2 trial planned in genital warts. A second product candidate, VP-103, is in pre-clinical development for plantar warts. For more information, visit www.verrica.com.
