

Verrica Pharmaceuticals Announces First Sale of YCANTH™ to FFF Enterprises

YCANTH™ is the first and only FDA-approved treatment for molluscum, a highly contagious viral skin infection affecting approximately 6 million people annually in the United States, primarily children

FFF Enterprises is Verrica's exclusive distribution partner for YCANTH™

WEST CHESTER, PA –August 24, 2023 (GLOBE NEWSWIRE) – Verrica Pharmaceuticals Inc. (“Verrica” or “the Company”) (Nasdaq: VRCA), a dermatology therapeutics company developing medications for skin diseases requiring medical interventions, today announced the first commercial sale of YCANTH™ to its exclusive distributor, FFF Enterprises Inc. (“FFF”).

“We are pleased to announce the first commercial sale of YCANTH™ to our exclusive distribution partner FFF Enterprises,” said Ted White, President and Chief Executive Officer of Verrica Pharmaceuticals. “As one of the nation’s most trusted specialty pharmaceutical distributors, FFF is well positioned to help Verrica introduce YCANTH™ as the first FDA-approved therapy for the treatment of molluscum contagiosum in the U.S. With this first commercial sale of YCANTH™, we continue to execute our launch plans and we look forward to providing a more detailed update on our progress in November.”

“FFF has a well-established reputation for partnering with companies like Verrica that develop innovative products to address a significant unmet medical need,” said Patrick M. Schmidt, the founder and Chief Executive Officer of FFF. “As the first FDA-approved product to treat molluscum, YCANTH™ clearly addresses a significant unmet need for the millions of children and adults with this viral skin disease. Through this distribution partnership with Verrica, we plan to introduce YCANTH™ into the U.S. dermatology and pediatric communities so that millions of patients can finally gain access to the first FDA-approved therapy for the treatment of molluscum.”

“FFF has consistently demonstrated true partnership and customer centricity that we value at Verrica,” said Joe Bonaccorso, Chief Commercial Officer of Verrica Pharmaceuticals. “With our sales and marketing team fully in place, we are excited to work in partnership with FFF so this large and underserved patient population can benefit from YCANTH™ therapy.”

About FFF Enterprises

Founded in 1988, FFF Enterprises Inc. is a privately held, multibillion-dollar specialty pharmaceutical distributor and diversified healthcare company. FFF Enterprises is the parent company to leading [specialty pharmacy Nufactor, Inc.](#), as well as [InCircle, LLC](#) and [RightNow Inventory™](#). Our partners include global pharmaceutical and biologics manufacturers, prestigious healthcare systems, large and independent retail pharmacies, and leading alternate

care sites. Our nationwide commerce is supported by a network of distribution and infusion pharmacy locations utilizing world-class technology and cybersecurity solutions.

Please visit [FFF Enterprises' news site](#), as well as [LinkedIn](#), [Twitter](#), [Facebook](#) and [YouTube](#) for more information about the company.

About Molluscum Contagiosum (Molluscum)

Molluscum is a highly contagious viral skin disease that affects approximately six million people — primarily children — in the United States. Molluscum is caused by a pox virus that produces distinctive raised, skin-toned-to-pink-colored lesions that can cause pain, inflammation, itching and bacterial infection. It is easily transmitted through direct skin-to-skin contact or through fomites (objects that carry the disease like toys, towels or wet surfaces) and can spread to other parts of the body or to other people, including siblings. The lesions can be found on most areas of the body and may carry substantial social stigma. Without treatment, molluscum can last for an average of 13 months, and in some cases, up to several years.

About YCANTH™ (formerly VP-102)

YCANTH™ is a proprietary drug-device combination product that contains a GMP-controlled formulation of cantharidin delivered via a single-use applicator that allows for precise topical dosing and targeted administration for the treatment of molluscum. YCANTH™ is the only product approved by the FDA to treat molluscum — a common, highly contagious skin disease that affects an estimated six million people in the United States, primarily children. Please visit [YCANTHPro.com](#) for additional information.

In addition, Verrica has successfully completed a Phase 2 study of VP-102 for the treatment of common warts and a Phase 2 study of VP-102 for the treatment of external genital warts.

YCANTH™ should only be administered by a trained healthcare professional. YCANTH™ is not for home use.

Indication

YCANTH (cantharidin) topical solution, 0.7% is indicated for the topical treatment of molluscum contagiosum in adult and pediatric patients 2 years of age and older.

Important Safety Information

CONTRAINDICATIONS:

None.

WARNINGS AND PRECAUTIONS:

- YCANTH is for topical use only. YCANTH is not for oral, mucosal, or ophthalmic use. Life threatening or fatal toxicities can occur if YCANTH is administered orally. Avoid contact with the treatment area, including oral contact, after treatment. Ocular toxicity can

occur if YCANTH comes in contact with eyes. If YCANTH gets in eyes, flush eyes with water for at least 15 minutes.

- Local Skin Reactions: Reactions at the application site may occur, including vesiculation, pruritus, pain, discoloration, and erythema. Avoid application near eyes and mucosal tissue, and to healthy skin. If YCANTH contacts any unintended surface, or healthy skin, immediately remove. If severe local skin reactions occur, remove prior to the recommended 24 hours after treatment.
- YCANTH is flammable, even after drying. Avoid fire, flame or smoking near lesion(s) during treatment and after application until removed.

ADVERSE REACTIONS:

The most common (incidence $\geq 1\%$) reactions are the following local skin reactions at the application site: vesiculation, pain, pruritus, scabbing, erythema, discoloration, application site dryness, edema, and erosion. Local skin reactions at the application site were observed in 97% of subjects treated with YCANTH during clinical trials. These local skin reactions are expected and related to the anticipated blistering response of the skin to cantharidin.

DRUG INTERACTIONS:

No studies evaluating the drug interaction potential of cantharidin have been conducted.

USE IN SPECIFIC POPULATIONS:

Pregnancy: There are no available data with use of YCANTH in pregnant women to evaluate for a drug-associated risk of major birth defects, miscarriage or adverse maternal or fetal outcomes. Given that systemic exposure to cantharidin following topical administration is low, maternal use is not expected to result in fetal exposure to the drug.

Lactation: Avoid application of YCANTH topical solution to areas with increased risk for potential ingestion by or ocular exposure to the breastfeeding child.

OVERDOSAGE:

Oral ingestion of cantharidin has resulted in renal failure, blistering and severe damage to the gastrointestinal tract, coagulopathy, seizures, and flaccid paralysis.

Please see accompanying full Prescribing Information.

To report SUSPECTED ADVERSE REACTIONS, contact Verrica Pharmaceuticals Inc. at 1-877-VERRICA (1-877-837-7422), or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch. Local skin reactions are expected and should be reported if they are severe.

About Verrica Pharmaceuticals Inc.

Verrica is a dermatology therapeutics company developing medications for skin diseases requiring medical interventions. On July 21, 2023, Verrica's lead product, YCANTH™ (cantharidin), became the first treatment approved by the FDA to treat pediatric and adult patients with molluscum contagiosum, a highly contagious viral skin infection affecting approximately 6 million people in the United States, primarily children. VP-102 is also in

development to treat common warts and external genital warts, two of the largest unmet needs in medical dermatology. Verrica is developing VP-103, its second cantharidin-based product candidate, for the treatment of plantar warts. Verrica has also entered a worldwide license agreement with Lytix Biopharma AS to develop and commercialize VP-315 (formerly LTX-315 and VP-LTX-315) for dermatologic oncology conditions.
